

# Computing

*This term Year 4 are learning all about data, how to collect it and how important it can be. One of their first lessons comprised of collecting data, on the colour and style of vehicles travelling along a motorway. They employed their previous mathematical learning to assist them, by using tally charts to gather the data.*

Moving forward with their computing knowledge, Year 3 looked at the word programme on their computers and practised how to edit the size, colour, or the font style of their text. This is an invaluable skill for them to learn as it aids them when creating new documents.

The children in Reception have been reinforcing their understanding of how to keep safe online. They have been talking all about what they should do if something pops up when they are on a device. They know they should always tell an adult.
